SUMMARY

Backend engineer with 4 years of experience shipping REST APIs in Node.js and Java.
Comfortable owning a service end to end, from schema design through deployment and on-call.

EXPERIENCE

- Backend Engineer Logistics SaaS (fictional co.), 2022 - Present
- ⌘ Maintain the shipment-tracking API used by roughly 12,000 registered users across 30 client companies.
 - ⌘ Added Redis caching to the tracking lookup endpoint, cutting average response time from 600ms to 180ms.
 - ⌘ Migrated background jobs from cron scripts to a BullMQ queue, which removed a recurring class of duplicate-send bugs.
 - ⌘ Participate in weekly on-call; handled 2 production incidents as primary responder.
- Junior Backend Engineer Digital agency (fictional co.), 2021 - 2022
- ⌘ Built CRUD APIs and admin dashboards for 6 client projects using Express and MySQL.
 - ⌘ Wrote integration tests that took the main project's coverage from 20% to 65%.
